

Fill Plant Manager

Winona, MN

Position Summary:

The Fill Plant Manager is responsible for the day to day operations of the Fill Plant, cylinder management and specialty gas lab initiatives. This position will contribute to overall departmental success through effective management of the Fill Plant team while satisfying MWSCO branch needs.

Primary Responsibilities:

- Manage the day to day business operations in the Fill Plant
- Ensure Fill Plant daily operations are performed in accordance with safety policies and regulatory requirements
- Coordinate efficient Fill Plant operations by assigning tasks and managing workflow
- Direct and prioritize allocation of cylinders to retail locations
- Coordinate with cryo department bulk tank/pumps and filling equipment issues/repairs, PM schedule, gas purity concerns
- Conduct all aspects of cylinder management, ordering and audits
- Provide leadership to Fill Plant team through delegation, training and communication

Skills & Abilities:

- Possess a thorough comprehension of handling and filling compressed and liquefied gases
- Knowledge of equipment associated with filling compressed, liquefied gases, hydrotesting and lab analysis
- Ability to deal with difficult situations in a diplomatic and professional manner
- Excellent analytical and problem solving skills
- Confidence to make independent decisions as well as ability to discern when to escalate issues
- Ability to recommend and implement process improvements as necessary
- Strong interpersonal skills, competency for understanding metrics and ability to present and communicate to all levels of the organization as well as external customers professionally
- Excellent oral and written communication and interpersonal skills

Physical Requirements:

- Regularly required to lift up to 50 pounds and move products or materials weighing 100+ pounds with the assistance of material handling equipment.
- Regularly lift 50 pound cylinders on/off skids as needed (manipulate/dead lift of weight)
- Manipulate full cryogenic liquid cylinders manually
- Work on the fill line for eight hours or more per day as demand dictates
- Frequent kneeling, bending, pushing, pulling and lifting

Interested candidates should submit a cover letter and resume to Lisa Lorsch, HR Manager, lisal@mwsco.com.
