

# AUTOPULSE Detection and Control Systems

## 24/7 Fire Protection

- Releasing capabilities for single and multiple fire hazards
- Analog addressable and conventional control units
- Modularity and easy system planning
- Superior precision and high noise immunity

## Applications

- Aircraft hangars
- Control rooms
- Data centers
- Electrical equipment
- Flammable liquid/chemical storage
- Generator rooms
- Laboratories
- Marine vessels
- Medical diagnostic rooms
- Paint spray booths
- Telecommunications
- Turbine generators
- Warehouses

Superior fire protection begins with superior fire detection and control. AUTOPULSE Detection and Control Systems provide ultimate life and asset protection against fire. Fire detection is followed by flexible alarm and control functions that notify occupants and automatically activate the fire suppression system.

## Safeguard your Business with Simple, Dependable Releasing Systems

AUTOPULSE conventional detection and control systems offer turnkey suppression solutions for hazards protection. The AUTOPULSE Z-10 and the AUTOPULSE 542 control units offer programming features that provide the system flexibility required by special hazard, fire suppression systems and supports clean agents as well as water mist, water deluge, pre-action sprinkler, foam, dry chemical and others.

The AUTOPULSE Z-10 control unit provides single or dual hazard, conventional agent releasing solutions for special hazard protection offering a selection of pre-programmed templates. The AUTOPULSE 542R control unit combines high system reliability and system flexibility for small to medium size, special hazard applications.

The AUTOPULSE 542D control unit is designed specifically for pre-action and deluge system applications. The control units are compatible with multiple types and brands of fire suppression systems, water systems and FM Groups of solenoids. They are FM and NYC fire department approved; UL, ULC and CSFM listed for automatic extinguishing agent, deluge and pre-action release control.
